# From My Heart

## Soil Health: Key to Thriving Crops

Soil health is the foundation of successful crop production. Healthy soil is rich in nutrients, organic matter, and microbial life, which are essential for robust plant growth. It improves water retention, reduces erosion, and enhances the resilience of crops against pests and diseases. Without healthy soil, crops struggle to thrive, resulting in lower yields and poor-quality produce. Investing in soil health is not just about increasing productivity; it's about ensuring sustainability.

At Krishikul, we recognize the critical role of soil health in agriculture. Our soil science lab is dedicated to empowering farmers with the knowledge and tools to assess and improve their soil health.

## **GVT partners with the Global Alliance for a Sustainable Planet (GASP)**

Global Vikas Trust has partnered with the Global Alliance for a Sustainable Planet (GASP), a New York-based organization dedicated to addressing global climate issues. This collaboration focuses on promoting carbon sequestration and reversing land degradation through regenerative agriculture. Together, we aim to enhance soil health, improve water conservation, and increase farmers' incomes, contributing to a more sustainable and prosperous world.

## **National Innovation Foundation**

Our founder and managing trustee Mr. Mayank Gandhi has been nominated by the Government of India as a member of the governing board of National Innovation Foundation-India.

# Noteworthy Event (Marathwada)

## MGNREGA Workshop in Mangrul Budruk

In Mangrul Budruk village of Manavat Taluka, under the Pathri cluster, a significant MGNREGA workshop was conducted at the District Silk Office. The event was honored by the presence of Mr. Raghunath Gawde, Collector of Parbhani District, along with Mr. Kadam, Head of the District Silk Office, and other key officials from the Agriculture Department.

During the workshop, insights were shared about our managing trustee, Mr. Mayank Gandhi, as well as the organization's objectives and initiatives. The discussion covered the fruit plantation and silk cultivation activities undertaken by GVT, water conservation efforts, and the positive impact these projects have had on increasing farmers' income. The session also highlighted success stories of farmers who have benefited from GVT's programs.

# Case Study (Marathwada)

A farmer from Nanded has transformed his life by shifting from Soybeans to Banana -G9 Tissue cultivation. This has led to a significant boost in his annual income showcasing the success of crop diversification.

<b>Name:</b>	Sudam Laxman Chabharkar
<b>Address:</b>	Village- Chabhara, Taluka- Ardhapur, Dist- Nanded
<b>Land:</b>	1.75 Acre
<b>Previous Crop</b>	Soybeans
<b>Previous annual net income/acre:</b>	₹14,286
<b>Current Crop:</b>	Banana - G9 Tissue
<b>Average Rate:</b>	₹12/Kg
<b>Current annual net income/acre:</b>	₹4,63,542

# Case Study (Palghar)

A farmer from Palghar has transformed his life by Mogra-Banglora cultivation. This has led to an income of ₹48,000 in 1 year from 0.15 acre. If calculated on a pro-rata basis the income could be around 3 lakh per acre per annum.

<b>Name:</b>	Vilas Janu Satpute
<b>Address:</b>	Village-Mangrul, Tal-Wada, Dist-Palghar
<b>Land:</b>	0.15 acre
<b>Previous Crop</b>	Not Applicable
<b>Previous annual net income/acre:</b>	Not Applicable
<b>Current Crop:</b>	Mogra-Banglora
<b>Average Rate:</b>	₹300/Kg
<b>Current annual net income/acre:</b>	₹ 3,00,000 (pro-rata basis)*

\*The farmer earns ₹48,000 in 1 year from 0.15 acre

# Gujrat: Bharuch Region

After a comprehensive needs assessment in Gujarat, Global Vikas Trust (GVT) identified significant potential and need among marginal farmers in the Bharuch region, prompting the initiation of our tree plantation project. This initiative aligns with our rural development and sustainability goals by enhancing local livelihoods and promoting sustainable agricultural practices. Following the region's selection, GVT engaged with local farmers and collaborated with gram panchayats to raise awareness about the project. These efforts included sharing successful outcomes from other regions, providing information on plants available at subsidized rates, and detailing the free training sessions offered to support plant growth.

# Sericulture Shed

## GVT Krishikul

GVT Krishikul is an upcoming farmer training centre and demonstration space to provide practical training and access to modern agricultural technologies. In the series of introducing demonstration spaces at Krishikul, sericulture shed is included in this report.

A sericulture shed is a specialized facility dedicated to the complex process of sericulture, which involves the cultivation of silkworms for the production of raw silk. The shed serves as a home for silkworms from the third instar stage until the formation of cocoons. The sericulture unit maintains optimal conditions for silkworm rearing, which contributes to the production of high-quality raw silk.

### Key Features:

Shed Dimensions: 72 × 28 feet

Height: 15 feet

5 Racks: Purpose-built for feeding and handling silkworms

Unit Capacity: Accommodating 200 Disease-Free Layings (DFLs)

# Do you know? (July 2024)

**How many Global River Aquashfts has Global Vikas Trust installed in the Paapnashi River?**

**To share your answer:**
